Human SOX10 mutations/polymorphisms

The following link connects to the NCBI SNP database, where the single nucleotide polymorphisms at the human SOX10 locus are indexed in detail.

[SOX10 linked SNPs \(NCBI\)](#)

The following link connects to a PDF-formatted illustration of human SOX10 protein. Included are the locations and sequence changes of all published mutations, categorized by the observed phenotypes. Polymorphisms in the SOX10 coding region are also included.

The following links will download PDF-formatted tables containing the mutations and polymorphisms shown in the human SOX10 protein illustration (above). There are two tables: Table A is organized by ascending amino acid position, and Table B is organized by phenotype. Primary reference source information and a brief description are included if relevant.
